WORK EXPERIENCE

Senior Application Development Engineer

Centene (Apex Systems)

02/2025 - Present

Remote (KS, WA)

Fortune 50 health insurer supporting Medicaid, Medicare, and commercial plans across the U.S.

- ▣ Delivered core features for the Find a Healthcare Provider platform using React, TypeScript, Next.js SSR, and Zustand, supporting multi-brand scale.
- ▣ Partnered with backend/BFF teams to implement dynamic query flows and multi-tenant UI logic for accurate provider search.
- ▣ Established frontend architecture patterns for state management, SSR, and accessibility, improving team delivery quality.
- ▣ Provided mentorship, code reviews, and debugging leadership to unblock developers and accelerate release timelines.

UI Engineer

Balance Innovations, A Brink's Division

11/2021 - 01/2025

Remote (MO, KS)

Cash management software developed for the retail environment

- ▣ Led development of a React + GraphQL device registration platform, improving onboarding efficiency.
- ▣ Rebuilt UI for cash-in-transit platform in Next.js, enhancing workflow speed and accessibility compliance.
- ▣ Mentored engineers and enforced code quality through reviews, standards, and onboarding.
- ▣ Built Node.js mock services to accelerate front-end development and QA cycles.

Application Developer

JE Dunn Construction

12/2020 - 11/2021

Kansas City, MO

One of Missouri's top construction firms breaking ground and restoring buildings around the nation.

- ▣ Introduced unit testing into React ecosystem, reducing defects and improving reliability.
- ▣ Built UI component library and Storybook setup, standardizing front-end patterns.
- ▣ Created SPFX/Yeoman project generator, cutting setup time by 50%.
- ▣ Delivered React apps integrated with .NET APIs, improving operational workflows.

Software Engineer

Cerner Corporation

06/2019 - 12/2020

Kansas City, MO

Healthcare technology company, developing services, solutions, devices, and hardware for the healthcare industry.

- ▣ Built and maintained Rails APIs and React UIs, enabling international deployments with React-INTL.
- ▣ Led migration from class components to React Hooks, modernizing front-end codebases.
- ▣ Upgraded legacy apps to modern architecture, improving performance and maintainability.

Software Developer Intern

O'Reilly Auto Parts Corporate

10/2017 - 06/2019

Springfield, MO

Nationwide auto-parts supplier, providing auto-parts for both professional-service and do-it-yourself customers.

- ▣ Developed React/Node.js apps and internal tools.
- ▣ Built Java services and batch jobs to support enterprise systems.

EDUCATION

BS in Software Development

Missouri State University

08/2015 - 05/2019

Springfield, MO
