WORK EXPERIENCE

UI Engineer
Balance Innovations, A Brink's Division

11/2021 - Present   *Lenexa, KS*
Cash management software developed for the retail environment

- Completed initiatives to develop modern React websites in a Next.js environment to replace legacy software.
- Peer review code and create and maintain issues across a Kanban board.
- Queried and mutated data from our GraphQL API using the Apollo framework.

Contact : Kate Morr - KMorr@balanceinnovations.com

Application Developer
JE Dunn Construction

12/2020 - 11/2021   *Kansas City, MO*
One of Missouri's top construction firms breaking ground and restoring buildings around the nation.

- Created and maintained construction management and business internal utility applications in React paired with the web framework SPFX.
- Developed and peer reviewed .Net APIs for performing CRUD operations on construction management and internal business data.
- Led maintenance and development of our internal custom component library, developed with SPFX, React, and Storybook.JS.

Contact : Mark Stocks - Mark.Stocks@jedunn.com

Software Engineer
Cerner Corporation

06/2019 - 12/2020   *Kansas City, MO*
Healthcare technology company, developing services, solutions, devices, and hardware for the healthcare industry.

- Developed medical coding software in Ruby on Rails, React, and SQL(Oracle and CCL) for use in multiple countries (Internationalized using React-INTL).
- Peer reviewed each others designs and written code using the Atlassian toolkit(Jira and Crucible).
- Supported and maintained existing projects using Jenkins CI & Splunk.

Contact : Binh Phung - Binh.Phung@cerner.com

Software Developer Intern
O'Reilly Auto Parts Corporate

10/2017 - 06/2019   *Springfield, MO*
Nationwide auto-parts supplier, providing auto-parts for both professional-service and do-it-yourself customers.

- Worked closely with a team of fellow developers in a Lean-Agile environment using the Atlassian toolkit (Jira, Crucible, Confluence).
- Developed and maintained Java and Node JS web application and batch jobs for internal and external use.
- Created and used Postgres and DB2 databases to manage data.
